OSINT REPORT MISSION SUMMARY

-  Mission Data Overview
-  Covid - 19
-  Deliberate Incidents
-  Accidental Incidents

-  Risk Analysis
-  Incident Type Analysis
-  Online Dashboard
-  Acronyms and Abbreviations

■ Mission Data Overview

- Period : 30 Days ()
- Data Points :
- Sources : +12 different sources

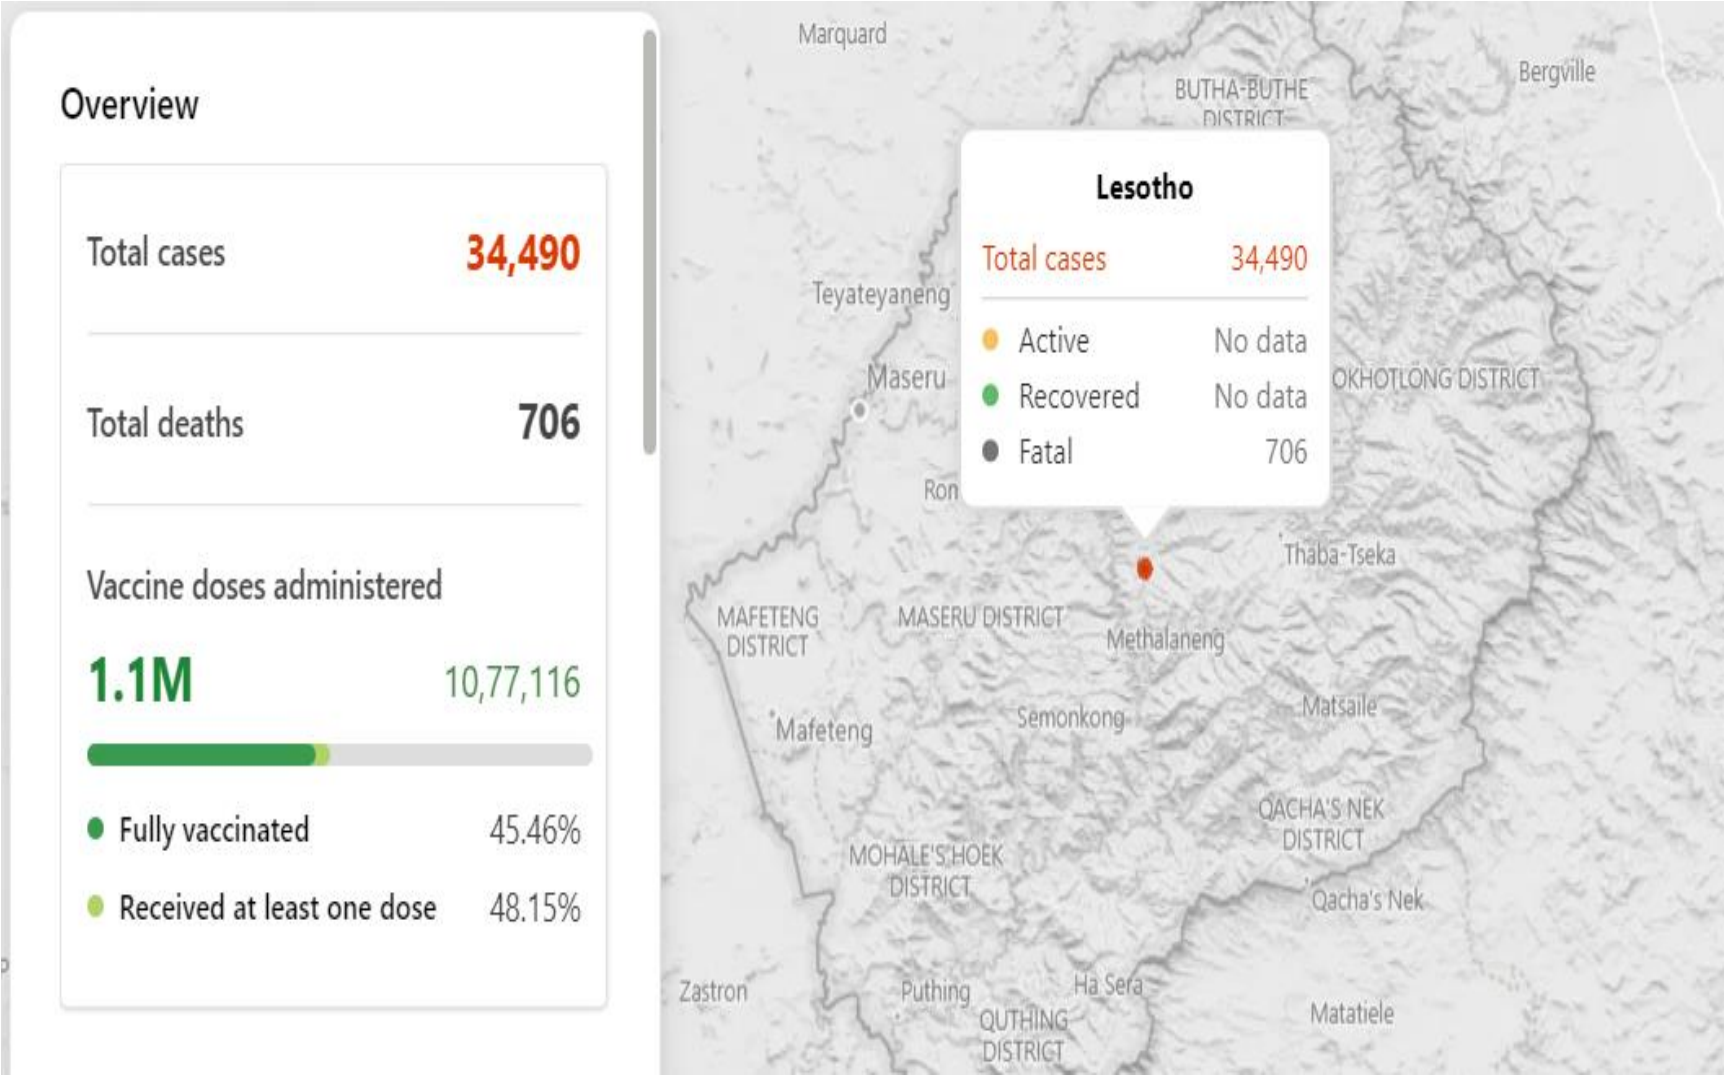

Methodology

Daily data gathering from open sources (mainly online newspapers and social media). Consolidation onto global database in combination with geographical information and analytical methodologies to analyse trends and distributions.

COVID-19

Coronavirus COVID-19 Cases by Location

Note: To view County data, select a US state.

Confirmed cases include presumptive positive cases. Recovered cases outside China are estimates based on local media reports and may be substantially lower than the true number. Active Cases = Confirmed - Recovered - Deaths. There are a few data points where Deaths or Recovered cases were greater than Confirmed cases or Active cases were negative. These data points are assigned a 0 for Active Cases.
